GRACEY CURETTES

Designed to adapt to a specific area or tooth surface
Area-specific to allow for deep scaling, root planing and periodontal debridement
Offset blade provides a perfect working angulation for the tooth surface
Offset blade angulation means only the lower cutting edge of each blade is used

PERIODONTAL KNIVES

Periodontal knives are manufactured from surgical grade stainless steel and are meticulously handcrafted to ensure smooth, sharp edges for precise incisions and efficient recontouring of soft tissue
From spear-shaped blades for excising interproximal tissue, to oval designs for initial gingivectomy incisions
The wide range of periodontal knives for various surgical and periodontal procedures
